# Tung-Hua Yu

**tunghuayu0@gmail.com** | **Github https://github.com/TUNGHUAYU** |

## SUMMARY

Have dual expertise in computer vision and network protocol. My fearless embracing of challenges motivates me to follow up on new-edge techniques from time to time. I keep doing the three actions—plan, conduct, and review—to ensure I go toward the goal properly.

## PROFESSIONAL EXPERIENCE

Mar 2022 - present
**Software Engineer, Arcadyan Technology Corporation, Hsinchu, R.O.C**

**Embedded Linux Router**

- IPTV for DT(Germany ISP)
  Modifying kernel/bridge module and userspace/mcproxy for customer IPTV feature request
- CICD for scheduling FW building
  Design portable CI/CD with gitlab-runner and docker for scheduling FW building.

Mar 2020 - Mar 2022 ( 2 years )
**Algorithm Engineer, Gingytech, Hsinchu, R.O.C.**

**Bare Metal Embedded Fingerprint Module**

- Fingerprint ISP / Encryption Library
  Implement memory management and encapsulation features.
  Implement a one-time password feature based on the AES-256 algorithm.
- Matching Performance Web-page
  Visualize matching performance with intuitive tables/diagrams on web-page..

Jan 2019 - Jul 2019 ( 6 months )
**R&D Intern, OMRON, Kyoto Japan**

**Intelligent Factory Application**

- Object Detector / Worker Action Classifier
  Improved accuracy of the detector based MASK-RCNN from 80% to 95%.
  Achieved accuracy of the Classifier based decision tree to 85%.

## EDUCATION

Sep 2016 – Sep 2019
**National Taipei University of Technology (NTUT), Taipei**
**Master, Computer Science**

- Published ICMLC Conference Paper
  An Accelerometer-Based Gait Analysis System to Detect Gait Abnormalities in Cerebrospinal Meningitis Patients
